SmartFill
GEN 2

The world's most functional fuel management system For All Types Vehicle

Simple, robust and functional wins in the long run.

Our three design principles keep fuel flowing and ensures that every drop is recorded to make accounting and fuel management easy.

A robust system you can rely on.

Fuel Tracking in any condition hot and cold
Minimize Fuel Theft improve Fuel Efficiency

PROVEN IN THE FIELD

ZASCO ZT-22 FUEL MONITORING TERMINAL

ZT-22 is the third and latest generation of GPS/GSM monitoring terminal developed by ZASCO GPS,

1. Real time GPS monitoring device with unique fuel control module.
2. Fuel theft alarm (sends SMS alert in case of fuel theft)
3. Vehicle security system with engine cut-off possibility
4. Remote control (activate vehicle's equipment remotely)

Direct connection to vehicle's fuel sensor.

ZT-22 have unique fuel control module with possibility connect to vehicle's original fuel sensor. No matter – is it passenger car, commercial van, truck or tractor. If there is fuel sensor in the fuel tank, ZT-22 can read it and provide accurate information about fuel level.

Fuel theft alarm

Each time after vehicle's ignition is switched off, ZT- 22 remembers actual fuel level in vehicle's fuel tank. In case if fuel level drops, ZT-22 will send SMS alert to predefined phone numbers and activates siren. Fuel theft alarm works with vehicle's original fuel sensor, there is no need to install additional fuel sensors.

Fuel data procession.

ZT-22 have built-in fuel data procession algorithm. Depending of vehicle usage, aquired fuel data will be processed, removing noises cause by fuel moving in the fuel tank. As result of data procession, ZT-22 correct amount of fuel to monitoring server.

Main Features

- Extra small size – only 67x45x18 mm
- Real time tracking
- Smart algorithm of data acquisition (time, speed, angle, special events)
- Very low GPRS traffic usage
- Protection against unlimited GPRS sessions
- Supports GPS and GLONASS
- Supports positioning based on GSM cells
- GPS signal interruption alert
- Large internal FLASH memory – stores up to 8000 km
- Vehicle's battery voltage monitor
- Automatic ENGINE running detecting
- Direct connection to vehicle's standard fuel sensor
- Fuel Theft alarm function
- Unique fuel data procession algorithm
